**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27, drawn to a smoking system, classified in class 131, subclass 194.
  - II. Claim 28, drawn to a method of making a cigarette, classified in class 131, subclass 281.
  - III. Claims 29-59, drawn to apparatus/method for perforating tobacco rod/manufacturing a cigarette/tobacco rod, classified in class 131, subclass 281.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and modes of operation. Invention I functions as a smoking system, which is different from the other inventions because it requires a cigarette and a lighter being mutually arranged. Invention II functions as a method of making a cigarette, which is different from the other inventions because it requires punching a row of holes along material with opposing rollers. Invention III functions as an apparatus/method for perforating tobacco rod/manufacturing a cigarette/tobacco rod, which is different from the other inventions because it requires a drum link-up assembly and an laser perforating means which

includes a beam splitter and a means to rotate the tobacco rod about its axis while pulsing a laser to burn holes therein.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, and the search required for Group II is not required for Groups I and III, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

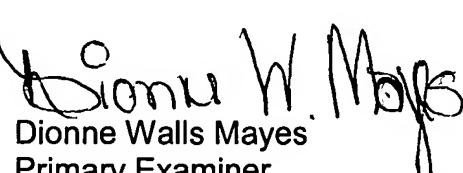

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
